CONVALESCENCE SUPPORT INSTANT

CONVALESCENCE

REHYDRATION SUPPORT INSTANT

REHYDRATION

### INDICATIONS:

- Anorexia.
- Malnutrition.
- Tube feeding.
- Inability to eat.
- Post-surgery.
- Pregnancy, lactation, growth.

### CONTRAINDICATIONS:

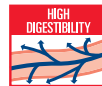

- None.

### FEEDING DURATION:

According to the veterinarian's assessment.

• Convalescence Instant Diet has a high energy concentration (4734 kcal/kg dry matter). Easily diluted with water, it becomes an energy dense and complete liquid diet which is highly palatable and highly digestible.

• Highly digestible ingredients compensate for the decreased activity of intestinal enzymes, ensuring an optimal nutrient supply.

• Antioxidant complex (Vit E, Vit C, taurine and lutein) reduces cell stresses caused by oxidative stress and free radicals.

### FURTHER INFORMATION:

It is estimated that 50% of hospitalised pets suffer from malnutrition. In critical situations (coma, paralysis, multiple fractures...), feeding a high energy diet pre- or post-surgery helps the pet's recovery. Convalescence Instant Diet can be diluted with water and fed by tube, syringe or voluntary feeding or the powder can be sprinkled on the pet's daily food.

### KEY VALUES (per 100 g dry matter)\*

Protein:	42 %
Fat:	25 %
Moisture:	4 %
Carbohydrate:	18.4 %
NFE:	20.1 %
Dietary fibre:	4.4 %
Crude fibre:	2.7 %
Metabolisable energy*:	473 kcal
Omega 6:	4 %
Omega 3:	0.5 %
Calcium:	1.2 %
Phosphorus:	1.0 %

### Synergistic antioxidant complex:

Vitamin E:	60 mg
Vitamin C:	25 mg
Taurine:	400 mg
Lutein:	0.3 mg

\* According to ATWATER's equation.

### INGREDIENTS:

Milk protein, vegetable oils, malt extracts, egg powder, minerals, maltodextrin, vegetable fibres, soya lecithin, taurine, Fructo-Oligo-Saccharides, marigold extract (rich in lutein), lycopene, beta-carotenes.

Box: 10 X 50 g

### RECOMMENDED DAILY INTAKE:

Mix the contents of 1 sachet with 150ml water to make 200ml solution.

dog			cat		
Dog's weight	Volume ml	sachet (50 g) approximately	Cat's weight	Volume ml	sachet (50 g) approximately

40 kg	1580	8	6 kg	300	1 1/2
45 kg	1770	9			
50 kg	1970	10	7 kg	350	1 3/4
55 kg	2170	11			
60 kg	2170	11	8 kg	400	2
			9 kg	450	2 1/4

## INDICATIONS:

- Acute diarrhoea.
- Post-surgery.
- Moderate vomiting.
- Parenteral/ enteral food transition.
- Moderate dehydration.

## CONTRAINDICATIONS:

- Should not be used in cases of anuria, persistent vomiting and insufficient digestive function.
- Diabetes mellitus.

## FEEDING DURATION:

According to the veterinarian's assessment.

- Rehydration Support Instant Diet formula has been designed to replace lost fluids and electrolytes in dehydrated dogs and cats. Sodium and chloride contents are approximately equivalent and compensate for losses.

## FURTHER INFORMATION:

Rehydration Support Instant Diet is a solution for oral administration which offers many advantages:

- easy administration.
- low cost.
- low supervision and maintenance.
- non-invasive technique.

## KEY VALUES (per 100 g dry matter)\*

Protein:	5.0 %
Fat	0 %
Moisture:	4 %
NFE:	82.2 %
Metabolisable energy*:	349 kcal
Sodium:	1.6 %
Potassium:	1.3 %
Chloride:	2.5 %

\* According to ATWATER's equation.

## INGREDIENTS:

Maltodextrin, glycine, sodium citrate, potassium chloride, sodium chloride.

## RECOMMENDED DAILY INTAKE:

Mix the contents of 1 sachet with 500ml water.
